

## Fourth Grade Summer Math

Before school starts in August, students should be able to complete a timed multiplication and division speed drill of 100 problems in under 5 minutes.

Multiplication facts include  $0 \times 0 - 12 \times 12$ . Division facts will include  $144 \div 12 - 0 \div 0$ . Students will be tested on the first full day of class.

Here are some online resources to help your child with these facts:

[math-aids.com](http://math-aids.com) has printable worksheets

[mathplayground.com](http://mathplayground.com) has games

[mrnuessbaum.com](http://mrnuessbaum.com) has games

[roomrecess.com](http://roomrecess.com) has games

Some apps: Kids Multiplication and Division

Multiplication Division for Kids

Monster Math

You can also use good old flashcards! You can put these in the car and have your student work on them while you drive down the road!! There are even some flashcard apps.

Thank you,
